

# GTT ENVISIONDX

**A unified digital experience for consistent control across networking and security**

Enterprises must handle an excessive number of vendors and multiple portals, all while relying on manual operations. Distributed systems just increase this complexity. Teams lose time as they need to switch between different tools while searching for information and attempting to unite disconnected data.

The pressure affects you as well because you need to lead customers through all stages of their networking and security digital transformation development process.

GTT EnvisionDX brings together all necessary functions into a single digital experience. The gateway provides complete, site-specific environmental visibility through its AI-powered agents, minimizing unnecessary work while surfacing essential information necessary to procure and run your customer's network.

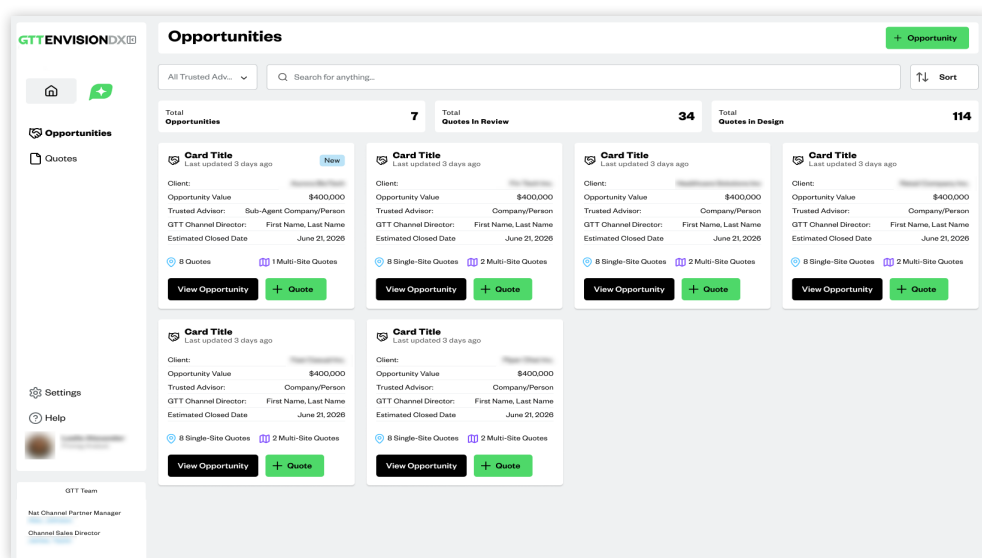

## WHAT GTT ENVISIONDX DELIVERS

|                                                                                                                           |                                                                                                                         |                                                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Performance Monitoring</b><br>Monitor site health, network paths, user experience and cloud access in real-time.       | <b>Site-Centric Model</b><br>Gain full visibility, ensuring every location is optimized for performance and efficiency. | <b>AI-Driven Chat</b><br>Answer questions about GTT and its products, providing instant, accurate support.                                 |
| <b>Deployment Acceleration</b><br>Standardized configurations providing faster activation steps reducing onboarding time. | <b>API-Driven Integration</b><br>Integrate data with internal monitoring systems and IT service management tools.       | <b>Partner Quoting</b><br>Simplify the configuration to quoting process, enabling faster, more accurate proposals driving business growth. |

## AI AGENTS THAT REDUCE EFFORT

GTT EnvisionDX includes the AI-driven Envision Virtual Operator (EVO) to support partners and customers, providing instant answers to questions about GTT and its products.

Remove friction from your workflow and enhance decision-making with real-time access to essential knowledge.

# DELIVER THE NEW GTT ENVISIONDX EXPERIENCE

Partners can now give their customers access to a guided, hands-on version of the whole configure, price and quoting process. This helps you:

- Show customers how the platform works
- Shorten adoption timeframes
- Familiarize internal teams with available tools
- Demonstrate the value of a unified digital experience

Enjoy easy, autonomous access to manage your and your customer's network

| Comprehensive Workflow Support,<br>Clear Oversight and Revenue Confidence                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>• <b>Account Awareness:</b> Quickly identify healthy sites, recurring issues or expansion opportunities.</li><li>• <b>Customer Insights in One Place:</b> Inventory and service history are all easy to reference with real time data.</li></ul> | <ul style="list-style-type: none"><li>• <b>Quote-to-Cash Path:</b> Display configuration to activation in a single view to reduce confusion and set clear expectations.</li><li>• <b>Operational Access:</b> Performance, inventory, tickets and billing are all accessible, helping you handle follow-up questions with confidence.</li></ul> |

## WHY PARTNERS CHOOSE GTT ENVISIONDX

- A single, global platform
- Simplified operations and autonomy for you and your customers
- Site-centric visibility, consistent workflows and accurate data
- Faster adoption and problem resolution
- Clearer paths to expansion, renewals and commissions
- More time spent with prospects and customers

## WHO IS GTT?

GTT is a leading network and security service provider for widely distributed organizations. We simply and securely connect people and agents to data and applications—anywhere in the world. We serve thousands of organizations, bringing together the right people, partners and technology to solve the most business challenges.

Built on our top-ranked global Tier 1 network, our portfolio includes SASE, SD-WAN, security, internet and voice services, all supported by a team that is obsessed with channel partners; delivering greater technology together.

## KEY FEATURES

### Visualize

Get a clear, site-centric view of performance, inventory, routing, policies and security behaviors. The platform prioritizes the information that matters so you can see issues quickly and explain them to customers without digging for data.

### Engage

Choose your preferred communication method for collaboration: portal or API. Enjoy rapid summarization and trend identification to anticipate customer needs.

### Consume

Modify service offerings with minimal steps. Streamline ordering for bandwidth, sites, cloud routes and security features so you can support growth without unnecessary delays.

### Manage

Reporting, access roles, policies and service changes are consolidated. Maintain uniform data entries between different accounts while minimizing the need for disparate systems.
