

GTT Awarded ChannelVision Magazine 2023 Visionary Spotlight Awards for Its Managed Services Technologies in Four Categories

Company offerings recognized as outstanding in categories of SD-WAN, cybersecurity, managed services and multilocation deployment

McLean, Va., July 07, 2023 — [GTT Communications, Inc.](#), a leading global provider of managed network and security services to multinational organizations, announced that the company's service offerings won ChannelVision Magazine's Visionary Spotlight Awards for Best Technology in four categories: software-defined wide area networks (SD-WAN), cybersecurity, managed services and multilocation deployment. The Visionary Spotlight Awards recognize outstanding products, services and deployments based on evaluation criteria including overall innovation, future industry impact, creativity and feature set differentiation, and ease of use and interoperability.

"GTT is honored to have been selected for these awards recognizing our outstanding service offerings in four different categories," said Todd Kiehn, senior vice president, Strategy & Product, GTT. "These offerings give our customers the benefits of security integrated into SD-WAN while supporting them with a full range of managed services and connecting global organizations around the world."

GTT won Visionary Spotlight Awards in the following categories:

SD-WAN

[GTT SD-WAN](#) gives customers a flexible and reliable way to ensure their networks can easily adjust to support the applications underlying their digital transformation initiatives, whether they relate to cloud adoption, hybrid work or other critical efforts. Delivered as a fully or co-managed service, GTT SD-WAN improves network performance while reducing the total cost of ownership. GTT provides management and monitoring tools customers need for agile changes to support network and application performance.

Cybersecurity

GTT was recognized for its in-depth approach to cybersecurity and its secure networking portfolio that includes [GTT Secure Connect](#), based on the SASE framework, which extends and strengthens the protection of enterprise networks connecting to the internet and accessed by users from any location. Secure Connect integrates SD-WAN with a comprehensive set of security features into a single cloud-delivered platform that protects all application traffic, providing seamless connectivity to GTT's global Tier 1 network for the best possible application performance and user experience for customers.

Managed services

GTT Managed Services give customers the capability to keep pace with emerging technologies while removing complexity from their enterprise networks and allowing them to focus on what they do best — running their businesses. [GTT Managed Networking Services](#) include CPE

supply, proactive monitoring and end-to-end management. GTT also offers [solutions](#) for Managed Detection and Response, Managed Firewall and DDoS Protection to help protect, prevent, detect and respond to cyberattacks.

Multilocation deployment

GTT was also recognized for the strength of its top-ranked Tier 1 backbone network, spanning six continents and connecting more than 600 global points-of-presence (PoPs). GTT delivers services through these PoPs or at any other location via an extended cloud ecosystem as well as a global network of 400 preferred access partners. Last year, GTT kicked off a [400G upgrade](#) to its global Tier 1 IP network to address its customers' continued double-digit increase in IP traffic, resulting in improved scalability and higher-capacity options for GTT's suite of enhanced internet and WAN services. GTT also recently announced the [expansion](#) of its network of scrubbing centers spanning four continents globally.

The Visionary Spotlight Awards are the latest in a series of industry accolades received by GTT. In April 2023, GTT Secure Connect won the [TMC 2023 INTERNET TELEPHONY](#) SASE (Secure Access Service Edge) Product of the Year Award. GTT was also recognized with three Visionary Spotlight Awards in 2022, awarded in the categories of Best International Internet Solution, SD-WAN & SD-Branch and Managed Services.

About GTT

GTT is a managed network and security services provider to global organizations. We design and deliver solutions that leverage advanced cloud, networking and security technologies. We complement our solutions with a suite of professional services and exceptional sales and support teams in local markets around the world. We serve thousands of national and multinational companies with a portfolio that includes SD-WAN, security, Internet, voice and other connectivity options. Our services are uniquely enabled by our top-ranked, global, Tier 1 IP backbone, which spans more than 260 cities on six continents. The company culture is built on a customer-first service experience reinforced by our commitment to operational excellence and continuous improvement in our business, environmental, social and governance practices.
