

GTT Earns Top Spot as Managed SD-WAN Leader in ISG 2023 Network Report Analyzing German Service Provider

ISG Provider Lens™ report ranks GTT in top Leader position in Germany for Managed SD-WAN enterprise network connectivity

McLean, Va., August 1, 2023 — [GTT Communications, Inc.](#), a leading global provider of managed network and security services to multinational organizations, has announced the company is designated a Leader in Managed SD-WAN for Germany by the Information Services Group (ISG), a world-renowned technology research and market intelligence advisory firm. [The 2023 ISG Provider Lens™ Network - Software Defined Solutions and Services Report](#) highlighted that GTT Managed SD-WAN provides customers with a wide range of SD-WAN choices from top-notch technology partners, ensuring optimum flexibility. Additionally, it emphasized the advantages of GTT's global Tier 1 IP backbone, which supports services and enables efficient customer traffic worldwide with reduced latency for enhanced performance.

"GTT provides customer-tailored SD-WAN solutions that are independent of any specific vendor. These solutions are efficiently managed and supported by a Tier 1 IP network, ensuring the highest level of security currently available in the market," said Kenn Walters, Lead Analyst, ISG.

GTT incorporates multiple SD-WAN gateways within its core network to efficiently manage the routing of cloud-bound and private WAN traffic across the network. Leveraging AI, their SD-WAN services continuously optimize customer networks in real time, intelligently directing traffic over the most optimal WAN circuit available. GTT ensures visibility and control of enterprise networking via its EtherVision portal offering comprehensive management features and transparency. GTT provides experienced solution engineers for technical adoption, design engineers for solution design, project managers to maintain documentation and ensure delivery on time and on budget, and a global technical team for on-premises hardware installation.

"We have consistently invested in enhancing our managed SD-WAN offering and are proud to be recognized as a Leader in Germany by ISG," said Todd Kiehn, Senior Vice President of Strategy and Product, GTT. "In today's landscape, bandwidth availability and application performance are of utmost importance, and we fully support our enterprise customers in achieving their connectivity goals through our extensive managed SD-WAN deployment experience and global network coverage."

The ISG report examined 25 enterprise WAN service providers that deliver managed solutions and services primarily for SD-WAN or hybrid MPLS/IP WAN.
