

GTT Awarded Managed Security Solution of the Year 2024 by CyberSecurity Breakthrough

Prestigious Annual Awards Program Honors GTT for Delivering Secure Cloud Networks to Enterprises in a Zero Trust Framework — Anywhere

ARLINGTON, Va., Oct. 15, 2024 — [GTT Communications Inc.](#), a leading networking and security-as-a-service provider for multinational organizations, has announced that GTT Secure Connect has won the “Managed Security Solution of the Year” CyberSecurity Breakthrough Award for 2024. The annual recognition program, now in its eighth year, is run by [CyberSecurity Breakthrough](#), a leading independent market intelligence organization that recognizes the top companies, technologies and products in the global information security market. The award recognizes GTT for enabling its customers to deliver secure cloud networks in a zero trust framework across the globe.

“GTT is proud to accept the Managed Security Solution of the Year award from CyberSecurity Breakthrough for our GTT Secure Connect SASE solution,” said Tom Major, Senior Vice President of Product Management and Technology, GTT. “With the evolving threat landscape and rapid growth of network traffic, today’s enterprises must be able to simply and securely connect people and machines to data and applications anywhere in the world leveraging zero trust best practices. GTT delivers a flexible, comprehensive SASE service and customers benefit from the orchestration, virtualization and automation native to our global Envision platform to seamlessly connect and secure their users, networks and clouds.”

“Through a comprehensive package of networking and layered security solutions, GTT provides next-generation connectivity and protection at the endpoint, all in one place,” said Steve Johansson, Managing Director, CyberSecurity Breakthrough. “Legacy on-premises network and security policies struggle to offer protection for the growing amount of users requiring secure remote access to corporate cloud environments. With its flexible SASE options, GTT protects enterprises with the people, processes and tailored designed solutions that meet the customer’s needs, requirements and compliance demands to defend against the ever-growing threat landscape.”

GTT Secure Connect provides security at the endpoint, different service levels for organizational needs, a dedicated private cloud, compliance, an enhanced network and end-to-end, 24/7 support from expert GTT analysts. GTT security solutions leverage innovative technologies and cloud-based security, offering two SASE solutions: a single-vendor SASE or best-in-breed dual-vendor approach. The single-vendor SASE offering provides a private cloud, eliminating security concerns around co-mingled data. The best-in-breed dual-vendor SASE offering can combine the SD-WAN and Secure Service Edge capabilities of several leading technology vendors.

Secure Connect is managed, customized and controlled through a single digital experience, EnvisionDX. The Envision platform also includes Managed and Professional Services, which provide experienced and certified experts to support and advise customers in designing, building and running services.

About GTT

GTT is a leading networking and security-as-a-service provider for multinational organizations, connecting people and machines to data and applications — anywhere in the world. We serve thousands of organizations, bringing together the right people, partners and technology to reduce the burden on IT teams and solve the most pressing networking and security challenges. Built on our top-ranked global Tier 1 network, the GTT Envision platform provides visibility, insights, orchestration and control, enabling customers with consumable solutions to achieve business missions and meet ongoing demand when, where and how needed. Our portfolio includes SASE, SD-WAN, security, internet, voice and other connectivity options, complemented by a suite of professional services and exceptional sales and support teams in local markets around the globe. We partner with our customers to deliver Greater Technology Together. www.gtt.net.
