

GTT Awarded Managed SD-WAN Leadership Status in Germany in 2024 ISG Provider Lens Network Report

Recognized for solution flexibility and global Tier 1 backbone strength

Arlington, Va., August 7, 2024 — GTT Communications Inc., a leading global provider of secure cloud networking solutions for multinational organizations, announced that the company has been named a Managed SD-WAN Leader in Germany by the Information Services Group (ISG), a world-renowned technology research and market intelligence advisory firm.

“GTT Communications (GTT) delivers a large portfolio of tailored managed SD-WAN solutions in the region, supported by a powerful access and technology partner network, along with a globally leading, advanced, Tier 1 IP backbone,” said Dr. Kenn D. Walters, Lead Analyst, ISG. “We are delighted to recognize GTT for the second consecutive year for its strength in providing leading Managed SD-WAN services in Germany.”

The 2024 ISG Provider Lens™ Network – Software Defined Solutions and Services Report examined 26 enterprise WAN service providers. It emphasized GTT’s well-established presence in Germany, and the flexibility afforded to GTT Managed SD-WAN customers to choose from an array of best-of-breed technology partners to meet their customers’ business requirements. The software-defined service is backed by GTT’s global, Tier-1 IP backbone, providing secure, high-performance transport between locations worldwide.

“GTT is honored to once again be named a leader in Managed SD-WAN in Germany, enabling our customers’ networks with continuous security and high bandwidth,” said Tom Major, Senior Vice President, Product Management and Technology, GTT. “We see demand in Germany and across the globe for advanced SD-WAN solutions that enhance security, achieve better application performance, and offer comprehensive features, delivering insights, co-management and cost efficiency. We’re committed to keeping German business connected and competitive with our Managed SD-WAN and complementary portfolio of cloud network security services.”

GTT Managed SD-WAN service offers a resilient network underlay with a secure, cloud-enabled, policy-based overlay, providing controlled and efficient management of the entire enterprise network. Through EtherVision, customers are provided with digital experiences, enabling visibility and control of their networks, and allowing for operational efficiencies. In addition, customers complement their in-house IT expertise with GTT’s professional services offering solution design, engineering and life cycle project management and governance. GTT Managed SD-WAN integrates seamlessly with GTT Secure Service Edge (SSE), providing customers with a Secure Access Service Edge (SASE) framework.
