

GTT Achieves HPE Global Service Provider Partner Status, Enhancing GTT Customer Experience

HPE recognizes GTT for its global management, logistics and support capabilities to secure enterprise cloud networking customer needs.

Arlington, Va., September 23, 2026 — [GTT Communications Inc.](#), a leading networking and security as a service provider for multinational organizations, has announced that it has achieved exclusive [HPE](#) Global Service Provider Partner status. GTT's inclusion in the program demonstrates its global scale, operational excellence and expertise in delivering managed services for enterprises in all HPE global regions. GTT and HPE have partnered for more than a decade to deliver secure cloud networking solutions for widely distributed enterprises worldwide.

GTT recently announced an extension to its [Secure Connect solution](#) to include HPE Aruba Networking Unified SASE as a fully managed service delivered globally through the [GTT Envision platform](#) and complemented by a comprehensive suite of professional services. For these enterprises, GTT's HPE Global Service Provider Partner status means a more consistent way to deploy, manage and scale secure cloud networking across regions. By combining HPE technology with GTT's global network, managed services expertise and [GTT EnvisionDX](#), customers can reduce operational complexity, improve visibility, and accelerate secure connectivity for users, sites, clouds and applications worldwide.

"GTT is one of only a small number of service providers to meet the stringent requirements of our Global Partner Program," said James Cassella, Vice President of Worldwide Sales, Global Managed Service Providers at HPE. "Together, HPE offers customers consistency and responsiveness through the combination of our technology and GTT's global connectivity reach, GTT Envision platform and one-of-a-kind digital experience, all wrapped in managed and professional services."

"The myriad choices organizations are facing as they work out how and where to deploy, connect and secure their users, agents and applications is pushing networking discussions to the foreground," said Tom Major, Senior Vice President of Product Management, GTT. "By combining HPE technology and GTT Envision, customers gain access to a globally proven solution bringing together secure connectivity, intelligent network visibility and control, and expertise that simplifies operations and support for our customers."

About GTT

GTT is a leading networking and security as a service provider for multinational organizations, simply and securely connecting people and machines to data and applications — anywhere in the world. We serve thousands of organizations, bringing together the right people, partners and technology to reduce the burden on IT teams and solve the most pressing networking and security challenges. Built on our top-ranked global Tier 1 network, GTT Envision is a single global technology platform to connect, orchestrate, virtualize and automate enterprise networks, enabling customers with consumable solutions to achieve business missions and meet ongoing demand when, where and how needed. Our portfolio includes SASE, SD-WAN, security, internet, voice and other connectivity options, complemented by a suite of professional services and exceptional sales and support teams in local markets around the globe. We

partner with our customers to deliver Greater Technology Together. For more information, visit www.gtt.net.
