

GTT Publishes Responsible Business Report

GTT reports on annual progress across environment, social and governance and introduces new Responsible Business strategy

Arlington, Va., September 24, 2026 — [GTT Communications Inc.](#), a leading networking and security as a service provider for multinational organizations, has published its fifth annual report outlining its progress across the areas of environment, social and governance throughout 2025. The report also introduces GTT's new Responsible Business strategy which reflects the company's focus on delivering exceptional customer experience, achieving operational excellence and strengthening its position as a technology innovator.

"This year marks an important development in how we approach sustainability at GTT, as we evolve our model into a comprehensive Responsible Business strategy," said Ed Morche, CEO, GTT. "This strengthens our ability to create lasting value, build resilience, and contribute positively to the broader digital economy through GTT's business operations. It helps ensure we align innovation with accountability as we pursue our goal of creating greater technology together with our customers, partners and stakeholders."

Notable developments set out in the report include:

- **Responsible Business strategy:** GTT has evolved its sustainability strategy and realigned its governance model around four new strategic pillars that support its Responsible Business strategy: Future-Ready Technology, Digital Security and Trust, Customer-Focused Workforce, and Responsible and Accountable Partners. These pillars connect GTT's business goals with the most impactful focus areas identified in its Double-Materiality Assessment and supports its progress toward alignment with the European Sustainability Reporting Standards (ESRS) under the Corporate Sustainability Reporting Directive (CSRD).
- **Improved accuracy of greenhouse gas reporting:** By enhancing its data collection processes and refining its methodology, GTT developed a more complete and reliable emissions profile in 2025. These changes were a primary factor in the company's reported 29.7% decrease across its total Scope 1, 2 and 3 emissions, together with incremental reductions from initiatives such as fleet electrification.
- **Expanded management system certifications:** GTT has enhanced its audit program to increase audit frequency and continue to drive toward higher compliance rates with key standards, including ISO 27001, ISO 22301, ISO 20000, PCI DSS, and SOC 1 and SOC 2. This continued focus throughout 2025 enabled GTT to recently extend its existing ISO 27001 and ISO 22301 site coverage to include its headquarters in Virginia.
- **Continued commitment to ESG disclosure frameworks:** In 2025, GTT refreshed its TCFD report, maintained a C for its CDP score and achieved an overall EcoVadis score of 70/100.
