

GTT SECURE CONNECT

Secure your people, data, and applications from any device, from anywhere.

With the evolving work from anywhere paradigm and the demand for access to corporate resources, both on-network and cloud-based, reaching unprecedented levels, traditional on-premises network and security solutions are increasingly challenged in providing the necessary protection and adaptability that businesses demand. Secure access service edge (SASE) addresses these challenges and provides the flexible access and cutting-edge security that modern enterprises require to keep their workforce productive.

SD-WAN

Better performing, more secure and highly reliable Wide Area Network

FWaaS

Scalable, elastic platform incorporating antivirus, firewall and anti-malware

SWG

Protects against cyberattacks from malicious websites

CASB

Monitors interaction with cloud activity and enforces security policies

ZTNA

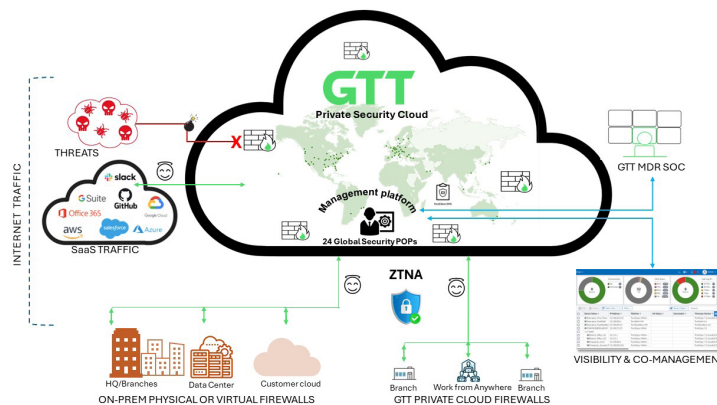

Establishes consistent security controls; enforcement based on identity

Where Software-Defined Networking and Cloud Based Security Integrate, Secure Connect is Born.

Secure Connect, GTT's managed SASE solution, delivers the people, processes, and tailored designed solutions that modern enterprises require to meet the challenges of the ever-growing threat landscape.

Using cutting-edge networking and security technologies and powerful Tier 1 cloud-based infrastructure, GTT can deliver either a single vendor SASE or best in breed dual-vendor SASE solution that protects user and applications at the office, in the hybrid cloud, and with remote workers.

GTT Secure Connect consolidates multiple security point solutions including Firewall as a Service (FWaaS), Secure Web Gateway (SWG), Cloud Access Security Broker (CASB) and Zero Trust Network Access (ZTNA) into a homogenous service delivered by the networking and security experts at GTT.

Secure Connect Powered by Fortinet Framework

We streamline the management of your network and security policies, giving your end-users the authentication to the apps they need to be productive without leaving those assets exposed to threats and vulnerabilities.

In addition, GTT offers multiple services tiers to provide the exact service experience and pricing they need as well as co-management options accessible through GTT's customer portal EnvisionDX. GTT's Professional Services are also available to ensure a seamless deployment, completely aligned with the customer requirements.

CHOOSING THE RIGHT SECURE CONNECT SOLUTION

GTT provides a comprehensive package of networking and layered security solutions powered by recognized industry leaders including **HPE Aruba**, **Fortinet**, and **VMWare by Broadcom** for SD-WAN, and **Fortinet** and **Palo Alto** for security to provide next-generation connectivity and protection with the options and flexibility that fits the needs of enterprises today as well as tomorrow.

Secure Connect Powered by **FORTINET**

- Single Vendor SASE Solution
- Powered by Fortinet security solutions and enabled by GTT's Tier 1 network
- Dedicated Private Cloud Security
- Security at the Endpoint
- Enhanced Network Capabilities
- Helps customers meet compliance demands and requirements
- Choice of service levels
- 365/24/7 Uptime Assurance
- Access to Co-Management Platform

Secure Connect Powered with **paloalto** NETWORKS

- Multi-Vendor Solution to address complex requirements
- SSE Services (FWaaS, SWG, CASB, ZTNA)
- Security at the Endpoint
- Enhanced Network Capabilities
- Helps customers meet compliance demands and requirements
- Choice of service levels
- 365/24/7 Uptime Assurance
- Access to Co-Management Platform

WHO IS GTT?

GTT is a leading networking and security as a service provider for multinational organizations, simply and securely connecting people and machines to data and applications – anywhere in the world. We serve thousands of organizations, bringing together the right people, partners and technology to reduce the burden on IT teams and solve the most pressing networking and security challenges. Built on our top-ranked global Tier 1 network, GTT Envision is a single global technology platform to connect, orchestrate, virtualize and automate enterprise networks, enabling customers with consumable solutions to achieve business missions and meet ongoing demand when, where and how needed. Our portfolio includes SASE, SD-WAN, security, internet, voice and other connectivity options, complemented by a suite of professional services and exceptional sales and support teams in local markets around the globe. We partner with our customers to deliver Greater Technology Together.

KEY BENEFITS

Enhanced security posture

Unleash productivity with safe, secure, high-performance communications with partners, suppliers, customers, and work from anywhere employees

Limit downtime due to network outages and damaging cyber attacks

Meet compliance challenges

Free up internal resources to focus on business-driving initiatives

Immediate value realization of your security investment

Flexible deployment options, catering to the diverse infrastructure needs of organizations including on-premises, data center, and cloud deployment models
