

GTT MANAGED FIREWALL

Combining expertise, passion and technology to protect your business.

Businesses face critical cybersecurity challenges marked by insufficient time, limited resources and a shortage of expertise and training to consistently manage and maintain effective firewalls. According to a September 2023 MIT Technology Review Insights Survey, 64% of respondents say candidates for their cybersecurity and technology jobs lack the necessary skills or experience. Another 56% cite an overall shortage of candidates as a concern. With these gaps, business continue to struggle with vulnerabilities stemming from outdated software, unmanaged devices and erroneous configurations, exposing them to hackers and cyber threats.

Partner with GTT security experts

GTT's Managed Firewall Service is a comprehensive, turnkey digital security experience that combines technology from industry-leading vendors with highly trained GTT security professionals dedicated to procuring, configuring, deploying, managing, and monitoring a customer's next-generation firewalls (NGFW) for real-time responses to potential cyber threats. GTT empowers businesses to delegate essential network and security management responsibilities to seasoned professionals, enabling organizations to concentrate on pivotal strategic initiatives.

People-powered protection

Beyond technology, GTT's Managed Firewall Service is a testament to our commitment to safeguarding organizations and their precious human assets. Featuring certified security professionals, we look to identify and eliminate threats before they impact your business.

Tailored deployments

GTT Managed Firewall Service provides flexible deployment options, catering to the diverse infrastructure needs of the organization. Whether the business has a small on-premise solution, a large data center firewall, or a highly distributed enterprise needing scalable, flexible cloud security solutions, GTT Managed Firewall can fit any business.
