

GTT ENVISIONCORE

The center of your network universe

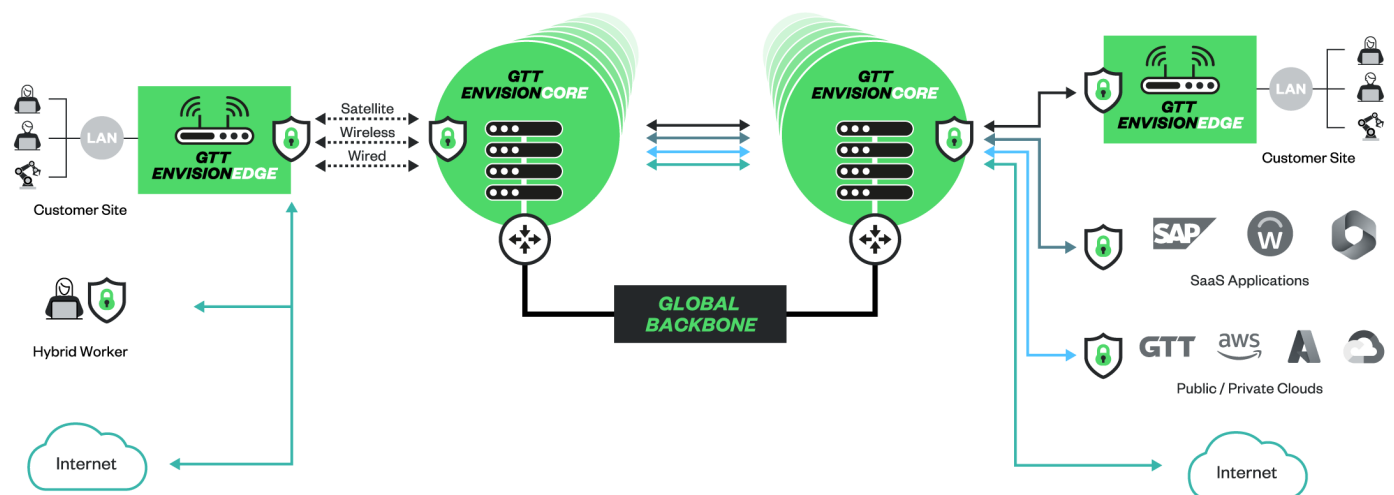

More traffic and more data generated by AI, rich media content, the adoption of cloud and IoT are now the standard for network environments. In addition, networking is required to be in more places, support more people and safely and securely onboard more applications, all while simplifying business needs, ensuring an uninterrupted experience and meeting rising demands of the user community.

Moving forward, network demand shows no signs of slowing down, with the market predicting a 28% CAGR in internet bandwidth usage. There is also a continued growth in SaaS applications with enterprises already averaging 130+ distributed applications each year.

ORCHESTRATE YOUR VIRTUALIZED NETWORK FUNCTIONS FROM THE GTT ENVISIONCORE, ACROSS GLOBAL LOCATIONS, TO YOUR PREMISES AND PEOPLE

GTT's global internet backbone and distributed compute platform with 25 sites deployed across six continents enables end-to-end service virtualizations. Our robust and expanding network connects to 450+ on-net POPs, increasing your connectivity options to and from adjacent markets and inter-continental destinations. Seventy-five percent of our customer traffic stays on our top-ranked Tier 1 global backbone, providing a higher level of performance, control and security to scale your business needs. We continue to invest in our network and have enhanced GTT EnvisionCORE with deeper software-defined networking capabilities.

Today, GTT connects and secures 140K+ customer locations in over 170 countries. We have deep partnerships with over 3,000 global connectivity and cloud partners so you are no more than one hop away from your data.

GTTENVISIONCORE CAPABILITIES

Cloud compute capabilities on premise or GTT EnvisionCORE

A distributed compute platform embedded and deployed across six continents for your virtualized networking, security and cloud services

Global scale and reach at your fingertips

One unified routing policy across a single, central network owned and operated by GTT

Secure, reliable connectivity to leading cloud providers and SaaS applications

KEY FEATURES

Access your choice of scalable connectivity and security infrastructure deeply integrated into GTT's Tier 1 IP backbone

Rapidly connect directly and securely to cloud service providers across the globe

On demand delivery, configuration and management of networking, security and hosted compute

WHO IS GTT?

GTT is a leading networking and security as a service provider for multinational organizations, simply and securely connecting people and machines to data and applications – anywhere in the world. We serve thousands of organizations, bringing together the right people, partners and technology to reduce the burden on IT teams and solve the most pressing networking and security challenges.

Built on our top-ranked global Tier 1 network, GTT Envision is a single global technology platform to connect, orchestrate, virtualize and automate enterprise networks, enabling customers with consumable solutions to achieve business missions and meet ongoing demand when, where and how needed. Our portfolio includes SASE, SD-WAN, security, internet, voice and other connectivity options, complemented by a suite of professional services and exceptional sales and support teams in local markets around the globe. We partner with our customers to deliver Greater Technology Together.
