

BUILD AND EXTEND YOUR GLOBAL NETWORK WITHOUT EXTRA COMPLEXITY

Connectivity providers are under constant pressure to extend their networks. You need to enter new markets, join new ecosystems and reach new customers. All this must happen alongside maintaining performance, resilience and operational control.

GTT offers a better way to grow your network. Instead of stitching together multiple providers, you build on **a single, globally integrated Tier 1 IP backbone and a portfolio of connectivity solutions**. Engineered for scale and operated as one network, our solution ensures smart growth without adding unnecessary work.

OPERATING AT SCALE WITH FEWER PROVIDERS AND CLEAR ACCOUNTABILITY

Using multiple vendors to extend a network often creates operational friction. Provisioning slows. Change management becomes harder. Escalation paths get confusing when you need clear answers.

GTT simplifies how extended networks are delivered and operated. We consolidate services on one global backbone and operating model.

- **IP Transit**
- **Dedicated Internet Access**
- **Ethernet/WAN/Cloud Connectivity**
- **DDoS protection**
- **300+ partner NNIs extend reach** when on-net build-out isn't practical
- **API-enabled integration** with **GTT EnvisionDX** supports quoting, provisioning and change management workflows.

Commercial terms are unified. Operational ownership is clear. Carrier-grade global NOC and SOC operations are aligned to wholesale environments, supported by teams that understand how large-scale networks actually run.

Stop coordinating providers and contracts. Your teams can focus on scaling services, supporting customers and executing on network strategy.

WHY NETWORK BUILDERS CHOOSE GTT

- A single, globally integrated Tier 1 IP backbone (ASN 3257)
- Ranked **#3 worldwide** by CAIDA AS Rank
- **~80% of traffic** originates and terminates on-net by design
- **~30% of global internet traffic** traverses the GTT backbone
- Built-in routing integrity with **RPKI validation**
- Available, **integrated DDoS protection** aligned to backbone operations
- Global aggregation and off-net reach via **300+ partner NNIs** where on-net build-out isn't practical
- Direct access to regional cloud on-ramps many providers struggle to reach
- Carrier-grade global operations with clear accountability

A FOUNDATION FOR GROWTH, WHEREVER YOU NEED IT

Whether you're reinforcing your backbone, reaching new markets, supporting enterprise services or handling demand spikes, GTT gives you the network foundation to scale.

CONNECT

where it matters

SECURE

performance as you scale

SIMPLIFY

how your network operates

KEY BENEFITS

Predictable performance as your network grows

Greater control over routing and interconnection

Resilience and routing integrity designed into the backbone

Simplified operations with fewer providers and clearer accountability

Flexible reach through aggregation, off-net delivery, and cloud on-ramps

ABOUT GTT

GTT is a leading networking and security as a service provider for multinational organizations, connecting people and machines to data and applications — anywhere in the world. We serve thousands of organizations, bringing together the right people, partners and technology to reduce the burden on IT teams and solve the most pressing networking and security challenges. Built on our top-ranked global Tier 1 network, the GTT Envision platform provides visibility, insights, orchestration and control, enabling customers with consumable solutions to achieve business missions and meet ongoing demand when, where and how needed. Our portfolio includes SASE, SD-WAN, security, internet, voice and other connectivity options, complemented by a suite of professional services and exceptional sales and support teams in local markets around the globe. We partner with our customers to deliver Greater Technology Together. For more information, please visit www.gtt.net.
